

Maths Activities

Summer 11

1. Counting- count up to 10, 20 and beyond. How far can you go?
Ask an adult to count and stop and you say which number comes next.
Can you say what number comes before?
Can you count backwards? Start at 5 and then at 10.
2. To help you to recognise your numbers have a go at the Adventure colour- by-number activity.
3. Have a go at writing numbers 6-10. You could try tracing them in a tray of salt or painting them with water and a paintbrush outside.
4. After the Zoom session on Wednesday have a go at sorting objects in your house into things that are heavy and things that are light.

Please bring your number cards 1-20 with you to the session on Wednesday.
